

Fangying Lin

Product Designer — Enterprise AI & Data Platform Experience

deniselin0114@gmail.com / deniselin0114@163.com · fangying-portfolio.vercel.app · Open to Beijing / Remote

SUMMARY

Product Designer with 8 years of experience across consumer and enterprise software, including 4+ years at Microsoft designing enterprise data and AI experiences for Azure Data / Microsoft Fabric. Led Microsoft Fabric Eventstream, a 0→1 real-time data platform, from concept to GA as sole designer — driving ~\$2M/month incremental revenue and 20K+ MAU. Deep experience designing for technical and developer audiences, translating complex data and AI workflows (Copilot, Agents, no-code/low-code) into intuitive, trustworthy experiences. 9 years based in the U.S., with strong bilingual communication and a track record partnering with global, cross-functional teams.

EXPERIENCE

Microsoft — Product Designer II (L62)

Azure Data | Microsoft Fabric & Azure Portal · Apr 2022 – Present

(Promoted L60 → L61 → L62)

Microsoft Fabric Eventstream — 0→1 Enterprise Real-Time Data Platform (Sole Designer)

- Owned end-to-end product design for Eventstream, Fabric's real-time data ingestion platform (Kafka, Salesforce, ServiceNow, Oracle CDC, and more), partnering with 3 PMs and 20+ engineers from concept through GA.
- Designed the no-code canvas/topology experience that lets data engineers build, monitor, and transform real-time streams into data assets consumable by Lakehouse, Eventhouse, Copilot, and Data Agents.
- Led user research and JTBD mapping to define how data engineers configure streaming pipelines; shaped the Copilot-assisted natural-language + visual-editing experience for pipeline setup.
- Designed the full data onboarding journey — connection setup, schema preview/selection, transformation, and destination mapping.
- **Impact: 20K+ MAU, ~\$2M/month incremental revenue for Fabric.**

Azure Stream Analytics (Portal + VS Code) — Sole Designer

- Designed the no-code editor and physical topology view for monitoring real-time node health, enabling low-code users to inspect and transform data streams.
- Drove iterative improvements across Portal and the VS Code extension based on telemetry and usage data.

Azure Event Hubs — Portal Experience

- Designed Data Explorer and Geo-replication configuration experiences for enterprise admins.

CGP Group (Cornerstone Global Partners) — Product & Design Manager

UX Design & Product Management · Nov 2018 – Apr 2022

(2 promotions in 3.5 years: Junior UX Designer → UX Designer & Product Specialist → Product & Design Manager)

- Owned end-to-end UX and product management for B2C/B2B O2O mobile and web products under Agile methodology — from research and UI design through roadmap and delivery.
- Ran user research, data tracking, and behavior analysis to guide product decisions; coordinated with engineering and external vendors to ship features on schedule.
- Led training and rollout for new feature launches and owned cross-department stakeholder communication.

EDUCATION

University of Illinois Urbana-Champaign — BFA, Industrial Design · 2013 – 2018

Fine & Applied Arts Talent Scholarship · 2018 School of Art + Design Exhibition (Krannert Art Museum) · College of Art+Design Student Ambassador

SKILLS

Figma, FigJam · Design Systems, Prototyping, UX Research (JTBD, Usability Testing) ·

Enterprise/Developer Experience Design · AI & Copilot-assisted Design · Mandarin (Native) / English (Professional Fluency)
